

# MASTER-LEE ENGINEERED PRODUCTS INC.

*Used in conjunction with the Master-Lee Engineered Products AirGrips Articulating system, EPI Articulating Wrist adds the maneuverability and rugged durability required for handling tools*

Typically, the Articulating Wrist is attached (via locking quick disconnect) to the bottom mast section, whereby allowing connection to all the EPI AirGrips adapters.

Although usually preset out of water, the Wrist is equipped with a release cable that allows the operator to remotely change the rotation in 0 to 90 degree increments.

The manually EPI Articulating Wrist is capable of rotation in degree increments, 0 degrees vertical 45-90 degree left and right with hard stops to prevent any rotation.

The Air Articulating wrist is also capable of rotation in degree increments, 0 degrees vertical to 90degree one side with hard stops. Operated by a double acting air cylinder with valve.
