

# MASTER-LEE ENGINEERED PRODUCTS INC.

*The Master-Lee Engineered Products Blockage Removal Tool provides a quick and easy method to dislodge restricting blockage in Flux Thimble Tubes.*

The EPI Blockage Removal System is designed for fast setup and efficient operation.

Safety for the operator as well as the thimble tube is this system's Job #1.

The Blockage Removal Tool easily dislodges most types of sludge buildups and debris.

## BLOCKAGE REMOVAL TOOL

The cable drum is made of a rugged, corrosive-resistant polyethylene which withstands harsh treatment. It will not dent, corrode, and cleans easily.

The cable is driven by a 1/3 HP motor that spins the cable at a rate of 190 rpm.

Offered as a complete system or individual tools, the EPI Flux Thimble Tube BLOCKAGE Removal System is a versatile system that can be incorporated into your standard inventory of maintenance tools. The basic system consists of the following:

- \* Cable Drive Motor
- \* 130 ft. Drive Cable
- \* System Carrier
- \* Remote Foot Control

For complete flux thimble maintenance services, Master-Lee EPI offers, through their affiliate Master-Lee Energy Services, experienced teams of field service specialists trained in flux thimble removal, seal replacement, guide tube eddy current inspection, guide tube/path flushing and maintenance advisory services.
