

MASTER-LEE ENGINEERED PRODUCTS INC.

The Master-Lee Engineered Products Flux Thimble Tube Expansion Tool provides a safe and reliable expansion of the Flux Thimble Tube.

Master-Lee Engineered Products Inc. (EPI) offers a HYDRAULIC EXPANSION TOOL for expanding flux thimble tubes. The primary purpose of this expansion is to be able to use standard Swagelok connectors and fittings when coupling non-standard size tubing.

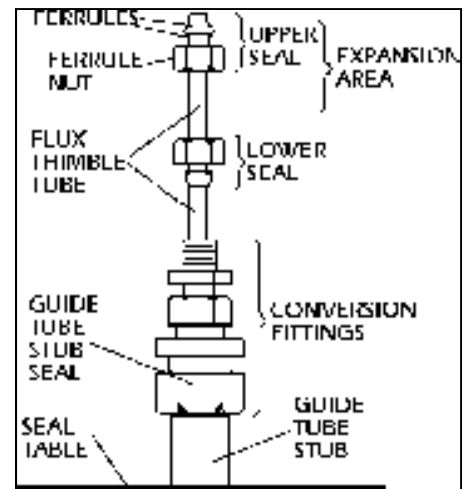

The EPI Tool is a easy to use hand held hydraulic unit that is light weight and manually operated. Designed specifically for the .300 OD flux thimble tubes, internal mandrels expand the specified length (up to 3 inches) of the tube to accommodate standard .314 Swagelok ferrules.

The Master-Lee EPI Flux Thimble Expansion System consists of the following:

Qty.	Description
1	Hydraulic expansion tool head
1	Hydraulic pump
1	Set of hoses and fittings
2	Mandrels for expanding tubes from .300 to .314 O.D.
1	Maintenance manual

(Adjustable 3 inch Expansion Tool with Electric Pump)

Along with the Expansion Tool, Master-Lee offers a comprehensive family of related tools for maintenance, cleaning, and replacement of flux thimbles and guide tubes. Master-Lee Energy Services can supply you with the trained specialists to provide you with turnkey inspection and maintenance of flux thimbles and seal table. Contact your EPI representative for additional information.
